

Preparing your healthcare facility for the unexpected

Your patients depend on you, having a contingency plan is more than making a list of the equipment that you need to rent until your system is able to get back on line. It is preparing your facility to be rental-ready. Identifying the risks and making certain that the appropriate connections are in place so temporary cooling can be connected quickly, this is essential to having a complete contingency plan.

Contingency Planning For healthcare facilities

We have the expertise to evaluate and recommend system upgrades that modernize your existing building within the cope of the Leadership in Energy and Environment Design (LEED) program.

Daikin Rental Solutions has created a program that helps healthcare facilities develop contingency plans for their critical HVAC systems. This entails an evaluation of the facility's cooling and power systems to identify potential sources of failure. The next step is developing a blueprint to show where the connections are made, where the equipment goes, and how to get it there.

If temporary cooling equipment is required, the plan can be commissioned at a moment's notice. The goal is to minimize downtime and reduce the risk of financial loss and patient care disruption due to a loss of your facility's HVAC system.

Plan Layout

- | | |
|--------------------------|------------------------------|
| Financial risk analysis | Power availability |
| Risk assesment | Electrical connection |
| Equipment identification | Temporary equipment location |
| Prioritization | Plan creation |
| System connection | Implement and review |

Equipment replacement

Old, inefficient equipment can be replaced with new technology that offers significantly reduced operating costs. Engineered turnkey assessments and solutions provide the most efficient cost savings equipment or system upgrade, installed seamlessly to get you running efficiently and saving money.

Knowing your risk

In times when the unexpected occurs, such as natural disasters, mechanical failures, power outages, and or fire can leave your facility in an unexpected outage situation. Being able to respond quickly and get your HVAC system working can make all the difference. With the proper plan in place, you can significantly reduce the time it takes to get your school back up and running. With a predetermined contingency plan, help is just a phone call away. Daikin Applied is ready to respond 24/7/365 to get you back up and running as soon as possible.

An outage can cause:

- › Dangerous patient environments
- › Disruption of medical services
- › Loss of air quality with the possible spread of contagions
- › Additional undue stress to the medical staff

Responses beyond emergencies

Daikin Applied can provide rental chillers when you need extra cooling during peak season, when you want redundancy, to supply cooling during planned maintenance, or to make it possible for your facility to maintain full cooling capabilities during retrofit, renovation, or replacement of older equipment.
